

ARUN KUMAR VERMA

MERN STACK DEVELOPER

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of experience in building scalable web applications using the MERN stack. Proficient in JavaScript, React, Node.js, and MongoDB. Strong problem-solving skills and a passion for continuous learning. Seeking a challenging role where I can contribute to innovative projects and grow professionally.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Namami Infotech Pvt. Ltd., Lucknow | July 2023 – Present

- Developed and maintained a large-scale e-commerce platform using React, Node.js, and MongoDB, handling over 10,000 daily users.
- Implemented a real-time chat system using WebSockets and Socket.io, improving user engagement.
- Optimized database queries and implemented caching mechanisms, reducing page load times by 40%.

MERN Stack Developer | Gahmar Admark Solutions Pvt. Ltd. (GASPL), Lucknow | Jan 2022 – Jun 2023

- Designed and developed a digital marketing campaign management system, enabling clients to track and optimize their ad spend.
- Implemented a robust API layer using Express.js and RESTful principles, facilitating seamless integration with third-party services.
- Collaborated with the design team to implement a responsive and user-friendly front-end interface.

MERN Stack Developer (Intern) | Hanumant Technology Pvt. Ltd., Lucknow | Oct 2024 – Mar 2025

- Assisted in the development of a new CRM module, focusing on data integration and reporting features.
- Participated in code reviews and learned from senior developers, contributing to the overall code quality.
- Managed the deployment of applications to the cloud using Docker and Kubernetes.

PROJECTS

Nutclick (D2C E-Commerce Platform) | Personal Project | 2023

- Developed a full-stack e-commerce application from scratch, including product catalog, shopping cart, and checkout process.
- Implemented a secure payment gateway integration using Stripe API.
- Optimized the application for performance, achieving a 95+ Lighthouse score.

Green Garden (Society & Property Management System) | Personal Project | 2024

- Designed a web application for managing property details, tenant information, and maintenance requests.
- Implemented a role-based access control (RBAC) system to ensure data security and privacy.
- Used GraphQL for efficient data fetching and mutation, improving the user experience.

Chacha Bhatiza Hotels (Hotel Management System) | Personal Project | 2024

- Developed a comprehensive hotel management system, including room booking, guest management, and billing.
- Implemented a secure authentication system using JWT tokens and bcrypt for password hashing.
- Generated detailed reports and analytics for hotel performance using data visualization libraries.

Vedanta Tech (Distributed Network Infrastructure) | Personal Project | 2024

- Designed a distributed network infrastructure for a large-scale application, ensuring high availability and scalability.
- Implemented a microservices architecture using Docker containers and Kubernetes for orchestration.
- Used Redis for distributed caching and message queues for asynchronous task processing.

Personal Portfolio & Web Showcase | Personal Project | 2023

- Developed a modern, responsive portfolio website showcasing my skills and projects.
- Implemented a blog section using a headless CMS (Next.js + Sanity) for easy content management.
- Optimized the website for SEO and fast loading times.
